

Matrix

Eisenhower Task Manager — User Handbook

Maruti Suzuki Internal Tool · v2.0

Q1 · DO FIRST

Urgent & Important

Handle immediately

Q2 · SCHEDULE

Not Urgent & Important

Plan and invest time

Q3 · DELEGATE

Urgent & Not Important

Hand off to someone else

Q4 · ELIMINATE

Not Urgent & Not Important

Drop or defer

Confidential · For internal use only

The Eisenhower Matrix Explained

The Eisenhower Matrix — named after President Dwight D. Eisenhower — is a simple framework for deciding what to work on. Every task is judged on two dimensions: **urgency** (does it need attention today?) and **importance** (does it move meaningful goals forward?). The four combinations create four quadrants, each with a clear action strategy.

The core idea: Every task belongs in exactly one quadrant. Two questions decide which — Is it urgent? Is it important? Be honest with yourself.

Q1 — DO FIRST · URGENT & IMPORTANT

Act on these immediately — they cannot wait.

These are crises, hard deadlines, and emergencies that only you can handle. Keep this quadrant as small as possible; a large Q1 means too many things have been left until they became urgent. **Examples:** Critical customer complaint that must be resolved today, a presentation due in two hours, a production line stoppage.

Q2 — SCHEDULE · NOT URGENT BUT IMPORTANT

Plan time for these — this is where your best work lives.

Strategic, growth-oriented tasks that have no immediate deadline but are essential to long-term success. If you never protect time for Q2, everything eventually explodes into Q1. **Examples:** Preparing a quarterly review, building a new process, developing your skills, relationship-building with key stakeholders.

Q3 — DELEGATE · URGENT BUT NOT IMPORTANT

These feel urgent but do not need you specifically — hand them off.

Tasks that must be done now but do not require your particular expertise or authority. These are prime delegation candidates. Always assign a named person so accountability is clear. **Examples:** Routine report distribution, meeting room booking, data entry, standard approvals.

Q4 — ELIMINATE · NOT URGENT & NOT IMPORTANT

Minimise or remove these entirely.

Activities that consume time without producing value. Ask yourself honestly whether this task needs to exist at all. **Examples:** Unnecessary email chains, redundant meetings, excessive social browsing during work hours, trivial admin.

Common mistake: Most people live in Q1 and Q3 and neglect Q2. The goal is to shift more work into Q2

MATRIX — that is where you do your best, most focused work calmly and proactively.

Signing In & Screen Tour

How to Sign In

- 1 Open the Matrix app URL in Chrome or Edge.
- 2 Enter your **@maruti.co.in** email address. Only Maruti email addresses are accepted — personal Gmail or other addresses will be rejected.
- 3 Enter your password and click **Sign In**.
- 4 First time? Click **Create Account** to register. Google Sign-In is not supported.

Only **@maruti.co.in** addresses work. Google sign-in buttons are not available. Contact IT if your account is locked.

The Top Bar

Matrix	Matrix	Stats	⚙
Icon / Link	What it does		
Matrix link	Your main task board (home)		
Stats link	Dashboard with KPI cards and charts		
Search bar	Filters tasks in real time across all quadrants		
Bell	Email reminder settings		
People	Manage people for delegation		
⚙ Gear	Categories, clear done tasks, dark mode		

The Matrix Board Layout

After signing in you see a 2×2 grid — one panel per quadrant. Each panel has a header showing the quadrant name, a count of open tasks, and an inline text field to add new tasks at the bottom. All four quadrants are visible simultaneously on desktop.

Element	Where to find it	What it does
Quadrant panel	One of four boxes in the 2×2 grid	Holds all tasks for that priority level
Inline add field	Bottom of each quadrant panel	Type and press Enter to add a task directly in that quadrant
Task card	Inside each quadrant panel	Shows task text, category badge, done state, and assignee chip
Search bar	Top bar, center	Type any keyword to instantly filter tasks across all quadrants
Archive panel	Below the grid (desktop)	Auto-archived done tasks; only shown when tasks exist there
Clear Done button	Top bar (desktop)	Removes all completed tasks from all quadrants at once

Managing Tasks

Adding a Task

- 1 Find the quadrant where the task belongs (Q1–Q4).
- 2 Click the inline text field at the bottom of that quadrant and type your task.
- 3 Press **Enter** to save immediately. The task appears in the list.

Write tasks as clear actions: "Call supplier about delivery" not "Supplier".

Editing a Task

- 1 Click the **pencil icon** on any task card to open the edit form.
- 2 Change the text, quadrant, category, or assignee as needed.
- 3 Click **Save** to apply changes.

Deleting a Task

- 1 Click the **X icon** on the task card.
- 2 The task is permanently removed. This cannot be undone.

Archiving a Task

- 1 Click the **archive (box) icon** on any task card to move it to the Archive right away.
- 2 Tasks also archive automatically once done for 7+ days. See the Archive section for restoring.

Marking a Task Done

- 1 Click the **checkbox** on the left of any task card.
- 2 The task immediately shows at **50% opacity** (faded) to indicate it is complete.

Q1 Priority Colour Gradient

Tasks in Q1 (Do First) are automatically colour-coded by their position in the list to help you see at a glance which task is the most urgent.

- 
- Top task — most urgent (red)
 - Second task
 - Third task
 - Further down
 - Lowest urgency in Q1 (blue)

The gradient runs red→blue from top to bottom. Reorder Q1 tasks by dragging them up or down to control the urgency signal.

Drag and Drop Between Quadrants

On desktop you can drag any task card from one quadrant to another.

- 1 Click and hold a task card to pick it up.
- 2 Drag it over the target quadrant — the panel highlights to show it will accept the drop.
- 3 Release to move the task. It lands in the new quadrant instantly.

Mobile: Drag and drop is not available on touchscreens. Open the pencil edit form and change the **Quadrant** dropdown instead.

Categories, Search & Archive

Categories

Categories are coloured tags — like "Work", "Personal", "Finance" — that appear as a small badge on each task card. They let you group tasks visually and understand where your time is going.

MANAGING CATEGORIES

- 1 Click the  **Gear icon** in the top bar to open Settings.
- 2 Select **Manage Categories**.
- 3 Type a name, pick a colour, and click **Add**. Repeat for each category you need.
- 4 Delete a category by clicking the X next to its name. Tasks with that category lose the badge.

APPLYING A CATEGORY TO A TASK

- 1 Click the **pencil icon** on a task card to open the edit form.
- 2 Choose a category from the **Category** dropdown.
- 3 Save — a coloured badge now appears on the task card.

Example category badges as they appear on task cards.

Search

The search bar in the top bar filters tasks **in real time** across all four quadrants simultaneously.

- 1 Click the search bar at the top of the page.
- 2 Start typing any keyword — tasks that do not match are hidden immediately.
- 3 Clear the search box to show all tasks again.

Search works across all quadrants at once. You do not need to check each quadrant separately to find a task.

Archive

The Archive keeps your quadrants clean without permanently deleting completed work. Tasks reach it two ways: **automatically** once they have been done for 7 or more days, or **manually** at any time using the archive icon on a task.

Detail	Behaviour
Auto-archive	Any task marked done for 7+ days moves to the Archive on its own
Manual archive	Click the archive (box) icon on any task to move it immediately
When it appears	Only shown when at least one archived task exists
Desktop location	Panel below the 2×2 matrix grid
Mobile location	Fifth tab in the bottom tab bar (labelled Archive)
Restore a task	Click the undo (↶) button — task returns to its original quadrant as incomplete
Permanently delete	Click the X button on an archived task — cannot be undone

Delegation & People

The **Delegate quadrant (Q3)** exists specifically for tasks that should be handled by someone else. Matrix lets you build a personal list of people and assign Q3 tasks to them — so accountability is always visible on the task card.

Adding People

People are managed through the dedicated people icon in the top bar — not the gear/settings icon.

- 1 Click the **People icon** (two figures) in the top bar.
- 2 Click **+ Add Person**, type their name, and save.
- 3 Each person is saved to your list and is available in the Assignee dropdown when editing any task.
- 4 To remove someone, click the X next to their name in the People panel.

Add your whole team here. Even if someone only receives one task, having them in the list makes tracking easy and prevents unowned Q3 tasks.

Assigning a Q3 Task

- 1 Click the **pencil icon** on any task card (especially Q3 tasks).
- 2 In the edit form, find the **Assignee** field and select a person.
- 3 Click **Save** — the person's name now appears as a chip on the task card.

You can assign tasks in any quadrant, but it is most meaningful in Q3 where delegation is the primary purpose.

The Assignee Chip

Once a person is assigned, their name appears as a small chip on the task card — visible at a glance without opening the task.

☐ Prepare monthly supplier report 

☒ Send budget update email 

Top: open task with assignee chip. Bottom: done task at 50% opacity.

Why This Matters

Situation	Action
Task needs someone else	Move to Q3 + assign a person
Q3 task has no owner	Assign immediately — unowned Q3 is a risk gap
Workload seems unbalanced	Check Tasks by Person chart on Stats page
Top Assignee KPI is high	One person is overloaded — redistribute tasks

An unassigned Q3 task is a gap — it is urgent but has no owner. The Stats dashboard shows an **Unassigned Q3** KPI. Aim for zero.

Email Reminders

Matrix can send you automatic email reminders about your pending tasks on a schedule you choose. Reminders are powered by **Microsoft Power Automate** running in the background — **you do not need to keep the app open** for them to fire. Once configured and saved, they run independently on schedule.

Setting Up Reminders

- 1 Click the **Bell icon** in the top bar to open Reminder Settings.
- 2 Toggle **Email Reminders** to ON.
- 3 Choose your preferred frequency from the list (see table).
- 4 Click **Save**. The modal will show "Next reminder: date/time" to confirm it is active.

After saving, close the app entirely. Reminders will still arrive in your Outlook inbox on schedule because they run in Power Automate, not in the browser.

Turning Reminders Off

- 1 Click the **Bell icon** to open Reminder Settings.
- 2 Toggle **Email Reminders** to OFF.
- 3 Click **Save**. No further reminder emails will be sent.

If you do not click **Save**, your changes will not take effect — the previous schedule remains active.

Frequency Options

Option	Use case
2 minutes	Testing only — verify reminders are working
5 minutes	High-intensity testing
15 minutes	Very active task management
30 minutes	Frequent check-ins during busy days
1 hour	Hourly nudge for Q1 tasks
4 hours	Twice daily check-in
8 hours	Start and end of working day
24 hours	Daily morning digest
2 days	Every-other-day review
3 days	Mid-week and end-of-week
7 days	Weekly review reminder
Custom	Enter any interval in minutes

Next Reminder Confirmation
After saving, the Reminder Settings modal displays "Next reminder: Mon 09 Jun 2026, 09:00" so you can verify the schedule is active and correct.

Stats Dashboard

The **Stats page** (stats.html) gives you a bird's-eye view of your task workload. It includes KPI summary cards, four charts, and an Excel export button. Open it from the **Stats** link in the top bar.

KPI Cards

Five summary cards appear at the top of the Stats page:

Charts

Chart	What it shows	How to use it
Tasks by Quadrant	Bar chart showing count of tasks in each quadrant (Q1–Q4)	Spot if too many tasks are piling up in Q1 (red = crisis) or Q4 (amber = waste).
Completion Rate	Bar chart of done vs open tasks broken down per quadrant	Identify which quadrant has the lowest completion — that needs attention.
Quadrant Moves	Line chart showing how many times tasks were moved between quadrants over time	A rising trend means you are actively re-prioritising — a healthy sign.
Tasks by Person	Grouped bar chart with one group per person showing their open vs done task counts	Check if workload is balanced. A person with many open tasks may need support.

Mobile Guide

Matrix is fully optimised for smartphones and tablets. The mobile layout replaces the 2×2 desktop grid with a **bottom tab bar** — one tab per quadrant plus a dedicated Archive tab. You work on one quadrant at a time by switching tabs.

Bottom Tab Bar

Five tabs appear at the bottom of the screen on mobile:

Tab	Quadrant
Do First	Q1 — Urgent & Important
Schedule	Q2 — Not Urgent & Important
Delegate	Q3 — Urgent & Not Important
Eliminate	Q4 — Not Urgent & Not Important
Archive	Archived completed tasks (5th tab — only shown when archived tasks exist)

Tap any tab to switch quadrants. Swipe left/right on the task list to navigate between quadrants quickly without using the tabs.

Adding Tasks on Mobile

- 1 Tap the tab for the quadrant where the task belongs.
- 2 Tap the inline text field at the bottom of the list.
- 3 Type the task and tap **Enter** on your keyboard.

Moving Tasks on Mobile

Drag and drop is not available on touch screens. To move a task to a different quadrant, use the edit form:

- 1 Tap the **pencil icon** on the task card to open the edit form.
- 2 Tap the **Quadrant** dropdown and select the destination quadrant.
- 3 Tap **Save**. The task disappears from the current tab and moves to the new one.

Archive Tab on Mobile

- 1 Tap the **Archive** tab (5th tab) to see archived tasks (auto-archived or manually archived).
- 2 Tap the **undo (↶)** button on a task to restore it to its original quadrant.
- 3 Tap the **X button** to permanently delete an archived task.

The Archive tab only appears when there are tasks that have been done for 7+ days. If you don't see it, no tasks have been archived yet.

Other Mobile Features

Feature	Mobile behaviour
Search	Available in the top bar — works identically to desktop
Bell / Reminders	Tap bell icon in top bar to configure
People icon	Tap to manage people list
Gear / Settings	Tap ⚙ to manage categories, clear done tasks

Best Practices & Troubleshooting

Daily Routine (5 minutes)

When	Action
Morning	Open Q1 — handle the top red task first before anything else
During day	Add new tasks as they arise; classify into the correct quadrant immediately
After each task	Tick the checkbox to mark done — keeps completion rate accurate
End of day	Review Q1 and Q3; reassign anything that changed priority
Weekly (Friday)	Review Q2 dates, check Stats charts, export Excel for records

Golden Rules

- ✓ **Keep Q1 small.** If it keeps growing, invest more time in Q2 planning. Crises shrink when you plan ahead.
- ✓ **Every Q3 task needs an owner.** An unassigned Q3 task is just an urgent task with no plan.
- ✓ **Use categories consistently.** They make the Stats charts meaningful and help you see workload by area.
- ✓ **Tick done, don't delete.** Completed tasks count in your Stats. Deleting removes them from history.
- ✓ **Set reminder frequency honestly.** 30-minute reminders work well for active days. Weekly for review-style users.

Troubleshooting

Problem	Fix
Cannot log in — "not authorised"	Use your @maruti.co.in email only. Google sign-in is not supported.
Forgot password	Click Forgot Password on the login screen and follow the email link.
Tasks not saving	Check your internet connection. Matrix syncs to the cloud — offline changes will not save.
Drag and drop not working	On mobile use the pencil edit form + Quadrant dropdown. On desktop refresh the page.
Stats page shows no charts	Add and complete at least one task first, then reload the Stats page.
Email reminders not arriving	Check Outlook spam/junk folder. Verify the Bell toggle is ON and you clicked Save.
Archive tab not visible (mobile)	No tasks archived yet. Archive appears only when done tasks are 7+ days old.
People/Tasks by Person chart empty	Add people via the icon and assign at least one task to a person first.
App looks broken or unstyled	Use Chrome or Edge. Clear browser cache with Ctrl+Shift+Del and reload.
Q1 gradient not showing colours	Add at least two tasks to Q1 — the gradient only
