

# Matrix

Eisenhower Priority Matrix — User Handbook

Maruti Suzuki Internal Tool · v2.0

Q1 · DO FIRST

**Urgent & Important**

Handle immediately

Q2 · SCHEDULE

**Not Urgent & Important**

Plan and invest time

Q3 · DELEGATE

**Urgent & Not Important**

Hand off to someone else

Q4 · ELIMINATE

**Not Urgent & Not Important**

Drop or defer

Confidential · For internal use only

# What is Matrix?

---

Matrix is your personal task manager built for Maruti Suzuki. It uses the **Eisenhower Priority Method** — a simple but powerful system to decide which tasks need your attention *right now* and which ones can wait, be delegated, or dropped entirely. Think of it as a to-do list with a brain.

**The core idea:** Every task you have should live in exactly one of four boxes based on two questions — Is it urgent? Is it important?

## The Four Quadrants

---

### Q1 — DO FIRST (RED)

#### Urgent & Important

These are on-fire tasks — deadlines, crises, emergencies. Work on these immediately. **Example:** Customer complaint that must be resolved today.

### Q2 — SCHEDULE (NAVY)

#### Not Urgent but Important

This is where growth happens. Plan these for your calendar. **Example:** Writing your quarterly review, learning a new skill.

### Q3 — DELEGATE (GREEN)

#### Urgent but Not Important

These feel urgent but don't need *you* specifically. Hand them off. **Example:** Routine report filing, meeting scheduling.

### Q4 — ELIMINATE (AMBER)

#### Not Urgent & Not Important

Time-wasters. Minimize or remove these. **Example:** Unnecessary browsing, trivial admin tasks.

**Tip:** Most people spend too much time in Q1 & Q3. The goal is to move more work to Q2 — that's where you do your best work calmly.

# Signing In & The Main Screen

## How to Sign In

- 1

Open the app URL in your browser (Chrome or Edge recommended).
- 2

Enter your **@maruti.co.in** email address. Only Maruti email addresses are accepted.
- 3

Enter your password and click **Sign In**.
- 4

First time? Click **Create Account** to register with your Maruti email.

Your data is private. No other user can see your tasks.

## Navigation Bar

Matrix

Matrix

Stats

Guide

| Link   | What it does                  |
|--------|-------------------------------|
| Matrix | Your main task board          |
| Stats  | Dashboard with charts & KPIs  |
| Guide  | This handbook (opens new tab) |
| Bell   | Email reminder settings       |
| Gear   | App settings & categories     |

## The Matrix Board

When you log in you'll see four boxes arranged in a 2x2 grid — one for each quadrant. Each box shows the tasks that belong there. You can see all tasks at once, search across all boxes, and drag tasks from one box to another.

| Area / Feature    | Where to find it            | What it does                                            |
|-------------------|-----------------------------|---------------------------------------------------------|
| Search bar        | Top of the page, center     | Instantly filters tasks by keyword across all quadrants |
| + Add Task button | Inside each quadrant header | Opens the form to create a new task in that quadrant    |
| Task card         | Inside each quadrant        | Shows task text, category tag, due date, and assignee   |
| Completed tasks   | Bottom of each quadrant     | Shown with a strikethrough; can be cleared all at once  |

# Managing Tasks

## Adding a Task

- 1 Click the **+** button in the quadrant where the task belongs.
- 2 Type your task description in the text box that appears.
- 3 Optionally pick a **Category** (tag), a **Due Date**, and an **Assignee** (person).
- 4 Press **Enter** or click the blue tick (✓) to save.

Write tasks as actions: "Call supplier" not "Supplier".

## Completing a Task

- 1 Click the **circle checkbox** on the left of any task card.
- 2 The task text will get a strikethrough — it's marked done!
- 3 Click the circle again to un-complete it.

**Remember:** Deleting a task is permanent. If you just finished something, tick the checkbox instead of deleting it — completed tasks count in your Stats.

## Recurring Tasks

When editing a task, you can set a **Recurrence** (Daily, Weekly, Monthly). When you tick a recurring task as done, it automatically reappears the next day/week/month so you never forget regular duties.

## Editing a Task

- 1 Click anywhere on a task card (not the checkbox) to open it.
- 2 An edit form opens — change the text, quadrant, category, due date, or assignee.
- 3 Click **Save** to apply changes.

## Deleting a Task

- 1 Open the task by clicking it.
- 2 Click the red **Delete** button in the edit modal.
- 3 Confirm deletion in the pop-up that appears. *This cannot be undone.*

## Clearing Completed Tasks

- 1 In the settings panel (⚙️), find **Clear Done Tasks**.
- 2 Choose to clear done tasks from one quadrant or all quadrants at once.

# Moving Tasks & Categories

## Moving a Task Between Quadrants

Priorities change. You can re-classify a task two ways:

### METHOD 1 — DRAG & DROP

- 1 Click and hold a task card.
- 2 Drag it over the quadrant you want to move it to (it will highlight).
- 3 Release to drop. The task moves instantly.

### METHOD 2 — EDIT MODAL

- 1 Click the task card to open the edit form.
- 2 Change the **Quadrant** dropdown.
- 3 Click **Save**.

Every move is logged automatically. You can see your quadrant movement history in the Stats dashboard.

## Categories

Categories are coloured labels (like "Finance", "HR", "Operations") that help you group and filter tasks.

### CREATING A CATEGORY

- 1 Click the ⚙ **Settings** icon in the top-right.
- 2 Go to the **Categories** section.
- 3 Type a name and pick a colour, then click **Add**.

### USING A CATEGORY

- 1 When adding or editing a task, select a category from the dropdown.
- 2 A coloured tag appears on the task card.

### FILTERING BY CATEGORY

- 1 Click a category button above the matrix grid to show only tasks with that category.
- 2 Click **All** to remove the filter.

## Due Dates & Reminders

### Set a Due Date

Pick a date when adding or editing any task. Tasks with dates show the date on their card.

### Overdue Warning

If a task is past its due date, the date shows in red automatically.

### Email Reminders

Click 🔔 to configure a daily digest email of your pending tasks.

# Delegation & People

The **Delegate quadrant (Q3)** is where tasks live that someone else should handle. Matrix lets you assign any task to a specific person — so you always know who owns what.

## Setting Up People

Before you can assign tasks, create the people you work with.

- 1 Click ⚙ **Settings** in the top-right.
- 2 Click **Manage People**.
- 3 Click **+ Add Person**, type their name, and save.
- 4 Each person gets a unique colour automatically.

 Add yourself as a person and assign tasks to *Self* to track your own workload separately from delegated work.

## Assigning a Task

- 1 Open any task by clicking it.
- 2 In the edit form, find the **Assignee** field.
- 3 Select a person from the list.
- 4 Save the task — the person's name now appears on the task card.

## How It Looks on a Task Card

Once assigned, you'll see a small person icon + name on the task card:

 Prepare monthly supplier report  Ravi Kumar

 Send budget update  Priya Singh

## Why Delegation Matters

| Situation                         | Action                                   |
|-----------------------------------|------------------------------------------|
| Task needs someone else's skill   | Move to Q3 + Assign person               |
| You're bottlenecked by one person | Check Top Assignee KPI in Stats          |
| Q3 tasks have no owner            | Assign immediately — unowned Q3 is a gap |
| Want to review delegated work     | Filter by person in Stats → People chart |

## Stats Dashboard — KPIs

The **Stats** page shows 13 KPIs (Key Performance Indicators). By default only 4 are shown — click **Customise** to choose which 4 you want on your dashboard. Here is what every KPI means:

| KPI Name        | What it measures                                          | Aim for                              |
|-----------------|-----------------------------------------------------------|--------------------------------------|
| Total Tasks     | All tasks you have ever created (open + done)             | —                                    |
| Completed       | Tasks you've ticked as done                               | As high as possible                  |
| Completion Rate | % of tasks that are done                                  | Above 70 %                           |
| Q1 (Do First)   | Open urgent & important tasks right now                   | Below 5                              |
| Q2 (Schedule)   | Open important tasks planned for later                    | Your largest group                   |
| Q3 (Delegate)   | Open tasks assigned to others                             | All should have an owner             |
| Q4 (Eliminate)  | Open low-value tasks                                      | Below 3                              |
| Overdue         | Tasks past their due date                                 | Zero                                 |
| Quadrant Moves  | Total times you've moved a task between quadrants         | Shows how actively you re-prioritise |
| Escalated to Q1 | How many tasks were moved <i>into</i> Q1 (urgency spikes) | Low (means fewer crises)             |
| Tasks Delegated | Open Q3 tasks with a named assignee                       | Match total Q3 count                 |
| Undelegated Q3  | Open Q3 tasks with <i>no</i> owner — an oversight risk    | Zero                                 |
| Top Assignee    | The person with the most open tasks assigned to them      | Balanced across team                 |

Click **Customise KPIs** on the Stats page to choose your 4 favourite KPIs. Your choice is saved automatically for next time.

## Stats Dashboard — Charts

The Stats page includes 8 charts. Like KPIs, you can display any 2 charts at once — click **Customise Charts** to choose. Here is what each chart shows:

| Chart                 | What it shows                                                         | How to use it                                               |
|-----------------------|-----------------------------------------------------------------------|-------------------------------------------------------------|
| Quadrant Distribution | Doughnut chart showing how many open tasks sit in each quadrant       | Are you over-loaded in Q1 (red)? Time to re-classify.       |
| Completion Over Time  | Bar chart of tasks completed each day over the last 14 days           | Spot your most productive days and dips.                    |
| Category Breakdown    | Horizontal bars — tasks per category                                  | See which work area has the most load.                      |
| Task Age              | How long open tasks have been sitting (0-3 days, 4-7, 8-14, 15+ days) | Tasks older than 7 days probably need a decision.           |
| Overdue by Quadrant   | Bar chart of overdue tasks split by quadrant                          | Q2 overdue = you didn't schedule; Q1 overdue = crisis mode. |
| Weekly Rhythm         | Tasks added and completed per day of the week (Mon-Sun average)       | Find your peak productivity day.                            |
| Quadrant Flow         | Horizontal bars showing which quadrant-to-quadrant moves happen most  | Lots of moves into Q1? You're not planning enough in Q2.    |
| Tasks by Person       | Grouped bars showing open vs done tasks per person                    | Check workload balance across your team.                    |

Charts update in real time as you add and complete tasks. No need to refresh the page.

# Export, Settings & Mobile

## Exporting to Excel

Download all your data as an Excel file (.xlsx) from the Stats page.

- 1 Go to the **Stats** page.
- 2 Click the **Export Excel** button.
- 3 The file downloads automatically with three sheets:

| Sheet          | Contents                                             |
|----------------|------------------------------------------------------|
| Tasks          | Every task — text, quadrant, category, status, dates |
| Summary        | All 13 KPI values at time of export                  |
| Quadrant Moves | Full history of task movements with timestamps       |

Export weekly to keep a local backup or share your progress with your manager.

## Email Reminders

- 1 Click the  bell icon in the top bar.
- 2 Toggle **Daily Digest** on and set a time.
- 3 You'll receive a daily email listing all your pending tasks.

## Settings Panel (⚙️)

| Setting       | What it does                                     |
|---------------|--------------------------------------------------|
| Categories    | Create, rename, or delete task labels            |
| Manage People | Add or remove people for delegation              |
| Clear Done    | Remove completed tasks from one or all quadrants |
| Dark Mode     | Switch to a dark colour theme                    |

## Using on Mobile

Matrix works on smartphones and tablets. The layout adjusts automatically.

- 1 On mobile, quadrants stack vertically (one below the other).
- 2 To move a task on mobile, open it and change the Quadrant dropdown.
- 3 Drag & drop also works on touch screens — press and hold, then drag.

For best experience, use Chrome on Android or Safari on iPhone. Add to home screen for an app-like feel.

# Best Practices & Troubleshooting

## Daily Routine (5 minutes)

| When       | Action                                                           |
|------------|------------------------------------------------------------------|
| Morning    | Check Q1 — handle anything urgent first                          |
| During day | Add tasks as they come; put them in the right quadrant           |
| End of day | Tick completed tasks; move anything that changed priority        |
| Weekly     | Review Q2, assign due dates, check Stats dashboard, export Excel |

## Golden Rules

- ✓ **Never leave Q3 empty of owners.** Every delegated task needs a person.
- ✓ **Keep Q1 small.** If it keeps growing, you need more Q2 planning.
- ✓ **Zero overdue = success.** Act on due dates before they pass.
- ✓ **One task, one action.** Write tasks as single clear actions.

 **The goal isn't a full board — it's a focused one.** The best Matrix users keep Q1 near zero, Q2 healthy, Q3 fully delegated, and Q4 ruthlessly trimmed.

## Troubleshooting

| Problem                         | Fix                                                                                                                             |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Can't log in — "not authorised" | Use your <b>@maruti.co.in</b> email only                                                                                        |
| Forgot password                 | Click <b>Forgot Password</b> on the login screen                                                                                |
| Tasks not saving                | Check your internet connection; tasks sync to cloud                                                                             |
| Drag & drop not working         | Try the Edit modal method; refresh the page                                                                                     |
| Stats page shows no data        | Add and complete at least 1 task first                                                                                          |
| Email reminders not arriving    | Check spam folder; verify toggle is ON in  |
| App looks broken on screen      | Use Chrome or Edge; clear browser cache (Ctrl+Shift+Del)                                                                        |
| People chart is empty           | Assign at least one task to a person first                                                                                      |
